

CIWM Waste Awareness Certificate

This intensive one-day course is accredited by the Chartered Institute of Waste Management (CIWM) and covers the key elements of waste management, waste minimisation and helps your organisation stay within the law. It is designed for those people who require a sound understanding of the issues involved in satisfying legal requirements and the associated practical implications including waste minimisation.

INTRODUCTION

Waste management legislation is complex and getting it wrong could land your company, and those responsible for any breach, in court. Managing your company's waste properly is not just about covering the legal angles. Waste is gradually becoming more expensive but, with costs spread around the organisation, the total waste and its cost are not always obvious. If you are not looking at waste costs – then what about your competitors? This course identifies the legal obligations of all those handling waste and provides practical solutions for waste management practices and significant cost savings. Companies with ISO 14001 certified systems can demonstrate improved competency in their management of waste and particularly if seeking improvements in this area this course can help to identify potential opportunities. Delegates are required to complete a multi-choice exam paper at the end of the course.

WHO SHOULD ATTEND?

All those with responsibility for ensuring waste management is dealt with in a legally proper manner and those who are seeking to improve their understanding of the legislation in place on waste. It is also useful for those who are trying to improve their company waste management. People who are trying to establish waste minimisation initiatives, perhaps in companies with ISO 14001 who are intending to focus on waste minimisation as part of their continual improvement programme.

COURSE OBJECTIVES

To enable those attending to understand waste, types of waste and how and where it is produced in the workplace, appropriate waste legislation with the aim of ensuring that these requirements are fulfilled in practice. To enable attendees to initiate a company waste minimisation programme.

COURSE CONTENT

- Waste definitions and types
- Waste categorisation and streaming
- Waste legislation and regulation
- Practical waste management including Duty of Care and Enforcement
- Waste reduction, re-use and recycling
- Waste disposal routes and records
- Storage and environmental aspects of waste

WHAT ARE THE BENEFITS?

Delegates can make an immediate impact on waste management practices within their organisation leading to long-term savings where appropriate. It will also improve confidence that company legal obligations with respect to waste are sufficiently addressed.

IN – HOUSE COURSES

Offering better value for money, they can be designed to closely match your specific requirements.

STYLE OF DELIVERY AND COURSE LEADERS

iQ management systems' philosophy is to create an atmosphere where delegates can gain most benefit from attending our courses. We believe that a relaxed and informal atmosphere helps to achieve this and our interactive training sessions and workshops promote understanding of the issues.

Our course leaders have substantial experience in the field of environmental management and pollution control. They are qualified and experienced trainers and consultants with extensive practical management experience across a wide range of sectors including manufacturing, finance, pharmaceuticals, local and national government.

CERTIFICATION

Delegates successfully passing the CIWM multi-choice exam will be awarded a CIWM certificate verifying successful completion of the course. Delegates not wishing to complete or failing the exam will receive an IQMS certificate of attendance.
